PURPOSE:
The purpose of this plan is to stabilize the site to prevent erosion of soil, rock, and water, and to minimize the potential for damage to existing or proposed adjacent properties. The plan includes construction of temporary fencing and the installation of erosion control measures in the construction zone and the surrounding areas.

EROSION CONTROL NOTES:
1. IT SHALL BE THE OWNER'S/CONTRACTOR'S RESPONSIBILITY TO MAINTAIN THE DETERMINED AREAS AND TO PREPARE A CORRECTIVE ACTION PLAN IN THE EVENT OF NONCOMPLIANCE WITH THESE NOTICES.

EROSION CONTROL MEASURES:
1. The facilities shown on this plan are designed to control erosion and sediment during the project. All contractors shall comply with the requirements specified in this plan. Failure to comply may result in corrective action being taken by the owner or the designer.

PERIODIC MAINTENANCE:
1. Maintenance is to be performed as follows:

Existing Tree Protection:
- Gravel Bag Inlet Protection

Construction Entrance:
- Straw Rolls, Family Planting
- Straw Roll Installation Requires Placement of Straw and Sticks to Provide Proper Stabilization

Sedimentation Basin:
- Filter Fabric Protection
- Inlet and Outlet Protection

STRAW ROLLS:
- Straw Rolls Family Planting
- Straw Roll Installation Requires Placement of Straw and Sticks to Provide Proper Stabilization

NOTES:
- All landowners, contractors, and subcontractors are responsible for ensuring that all erosion control measures are properly installed and maintained.
- All erosion control measures shall be checked at regular intervals to assure proper function.
- Straw rolls shall be replaced as necessary following SLT/SLM buildout.
- Any other erosion control measures shall be checked at regular intervals to assure proper function.
